## Foreword to the Index

This replacement index has been revised, second expanded and updated to include index treatment of legislation through the 2012 Regular Session. In order to provide a more effective guide to the statutory law, each section of the Idaho Code, as well as each entry in the 2011 replacement index, was reexamined in light of subsequent amendments, enactments and repeals. Also contained in this replacement index is an index to local and special laws.

The general index contains treatment of the laws compiled in the Idaho Code, the constitutions of Idaho and the United States, the Organic Act of the Territory of Idaho, the Idaho Admission Bill, Federal Laws of Particular Interest to Idaho and the various rules of the state courts. Statutory provisions are referred to in the index by section number (e.g., §18-105). The constitutions, court rules and other contents are identified by abbreviations, a table of which follows this foreword.

The general index is a topical index, not a random word index. Random entries in an index to statutes are misleading since they result in split or partial treatment. Therefore, we have chosen to use a systematic arrangement of main topical headings in order to avoid this split treatment. Main headings in the general index treat subject matter exhaustively, unless cross references are made to other main headings.

Users often inquire as to Michie's® use of cross references in indexes. Cross references serve to keep indexes to a manageable size by reducing the amount of repetition of treatment under different headings. To make the cross references even more useful and efficient, group section references, which cite the user to the principal statutory treatment of the subject, have been attached to many of our cross references; this provides the user with the option to ignore the cross reference altogether by going to the code for the cited material.

Main headings were derived from the language of the Idaho Code, from the phraseology commonly used in the courts of Idaho and from terminology commonly used in the legal profession. In addition, an effort was made to employ phrases and terms commonly applied to Idaho Code sections, such as frequently used nonlegal terms.

We solicit your help in keeping this index as usable as possible and ask that you inform us of any popular names that may have eluded us by returning the business reply cards found inside the back cover of each index volume. You may also use the cards to tell us of any errors we have made or improvements you think we should make. Michie® also maintains a **toll-free Index number (1-800-897-7922)** for use by those needing immediate help in locating a particular section or by those desiring to make comments or suggestions. Additionally, you may reach the Indexers by **fax (1-434-972-7686)**; or by **Internet E-mail (lng-cho-indexing@lexisnexis.com)**. All suggestions, questions or comments receive serious consideration. For non-index questions and comments, or to place orders, Customer Service may be reached by **toll-free telephone number (1-800-833-9844)**, or by **toll-free fax (1-800-828-8341)**.

The general index does not attempt to cover each topic in the vast field of law but refers only to those materials contained in the Idaho Code. A thorough knowledge of the format and terminology of the Idaho Code is essential to the use of this index as a guide to subject matter.

A few basic rules for using this index are:

(1) *Gain familiarity with the contents of the Idaho Code and the index.* Knowledge of the arrangement, terminology, topical treatment, analyses and reference system of both the code and the index is essential and must be acquired through examination and study.

(2) *Consult the principal subject and not the secondary subject.* Thus, for motor vehicle registration, look under motor vehicle registration and not under registration; for attorneys' fees, look under attorneys' fees and not under fees; for sales of alcoholic beverages, look under alcoholic beverages and not under sales.

(3) *Look for the noun and not the adjective.* Thus, for foreign corporations, look under corporations and not under foreign; for primary elections, look under elections and not under primaries. An exception to this rule is made for commonly used phrases or terms of art that are expressed in unitary phrases. Thus, for wrongful death, look under wrongful death and not under death; for declaratory judgments, look under declaratory judgments and not under judgments.

(4) *Consult the most pertinent subject.* Thus, for claims against estates, look under decedents' estates and not under claims or creditors or liens.

(5) *Consult allied headings.* If your search under one heading is to no avail, try another allied heading. Thus, if a search under the heading police is fruitless, try sheriffs or peace officers or law enforcement officers or other related headings. Each section has itemized entries, but perhaps they appear under headings that may not have initially occurred to you.

(6) *Use cross references.* Pay close attention to and make full use of the index cross references.
